CHIEF SECRETARY'S OFFICE,

DUBLIN CASTLE,

5th February, 1920.

SIR,

I have to acknowledge the receipt of your letter of the 2nd instant, forwarding for submission to His Excellency the Lord Lieutenant the Report on the Trade in Imports and Exports at Irish Ports for the year 1918.

I am, Sir,

Your obedient Servant,

JAMES MACMAHON.

THE SECRETARY,

DEPARTMENT OF AGRICULTURE AND

TECHNICAL INSTRUCTION,

DUBLIN.

REPORT ON THE TRADE
IN
IMPORTS AND EXPORTS AT IRISH PORTS
DURING THE YEAR 1918.

TO THE SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND
TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Report on the Trade in Imports and Exports at Irish Ports during the year ended 31st December, 1918.

Up to the present it was not possible to issue any Reports of this series until many months, and on some occasions not until more than twelve months, after the end of the year to which the figures referred. Since the outbreak of war the Reports were delayed owing to unavoidable circumstances, but in 1919 it was possible to arrange to have all the necessary particulars for future Reports completed earlier than before the war. Moreover, since May, 1919, detailed up-to-date information with regard to the Irish trade in many of the principal commodities has been published, and is being published monthly.

The inadequacy of the present system of voluntary returns upon which these Reports are based has been fully dealt with in previous Reports. The inadequacy has been all the more marked since the outbreak of war. In this connection it should be mentioned that under the Defence of the Realm Act the Food Controller made "The Irish Returns Order, 1918," which came into force on the 9th November, 1918, requiring all owners of vessels engaged in the Cross-Channel trade between Ireland and Great Britain to furnish compulsory returns of the quantities of certain specified articles shipped or unshipped at Irish Ports to or from Ports in Great Britain and the Isle of Man. Returns are required in respect of 45 articles imported and 43 articles exported. These compulsory returns are very much more satisfactory than the voluntary returns; they are received daily, and are up-to-date, and the commodities are described in a precise manner. They give a further proof of the necessity

of changing the whole system of Irish trade records from a voluntary to a compulsory basis.

In the tables and figures herewith submitted, as explained in previous Reports, Irish imports and exports mean all goods imported or exported by Ireland, whether from or to Great Britain, the Colonies, or foreign countries—the terms including not only the colonial and foreign trade, but also the Cross-Channel trade between Great Britain and Ireland.

From the year 1904, the first year for which records of Irish trade are available, up to the beginning of the war, there was a gradual increase in the prices of Irish imports and exports; from the beginning of the war the rise in prices became immensely greater. Accordingly, in order to eliminate the effect of the change in prices, and to give an indication of the change in the total quantities imported into and exported from Ireland, the values of imports and exports shown in the following table are estimated, not only at the prices in the year of actual shipment, but also at the corresponding prices in 1904.

CHANGES IN THE VOLUME OF IRISH IMPORTS AND EXPORTS.

It will be seen from the above table that although the total values of imports and exports measured at war prices increased enormously in the last few years the actual quantities imported and exported (as indicated by the values at 1904 prices) decreased considerably.

The volume of the import trade (measured at 1904 prices) which was £62,986,000 in 1913 (as compared with £55,345,000 in 1904) fell to £49,770,000 in 1917, and to £44,168,000 in 1918.

The value of the export trade (measured at 1904 prices) which increased from £49,785,000 in 1904 to £56,968,000 in 1910 remained at much the same level in 1911 and 1912 (in which years exports of cattle were abnormally low owing to the lack of keep in Great Britain in the very hot summer of 1911 and to shipping restrictions in 1912 on account of Foot and Mouth Disease). The volume of exports rose abruptly in 1913 and 1914 chiefly owing to abnormal exports of cattle in both years (in 1913 owing to the glut after the restrictions of 1912, and in 1914 owing to the extremely heavy demand in Great Britain in the first five war months). The exports in 1913 and 1914 were accordingly abnormally high. Most of the decline in the volume of export trade which can be attributed to the war took place in the year 1918. The exports at 1904 prices fell from £58,372,000 in 1915 to £56,702,000 in 1917 and then dropped to £50,611,000 in 1918.

CHANGES IN THE PRICES OF IRISH IMPORTS AND EXPORTS.

The imports in 1918 when valued at 1904 prices amounted to only £44,168,000, whereas when valued at 1918 prices they amounted to £126,018,000; accordingly the general level of prices of the commodities imported in 1918 increased from 1904 to 1918 by 185·3 per cent. Similarly the general level of prices of the commodities imported in 1917 increased from 1904 to 1917 by 141·0 per cent. In this manner the following table has been constructed, but when analysing the figures it should be carefully borne in mind that the relative importance attached to the price of a particular commodity (*e.g.* eggs) in a particular year (*e.g.* 1918) depends on the quantity shipped in that year, and accordingly the "weighting" of commodities varies from year to year. The change of "weighting" probably largely accounts for the fact that while the increase in price from 1904 to 1917 of the imports in 1917 was 141·0 per cent., and of the exports only 135·9 per cent., the increase in prices from 1904 to 1918 of the imports in 1918 was only 185·3 per cent., while the increase in the price of exports was 202·1 per cent. This relative change from 1917 to 1918 was, no doubt, caused by the restriction in Irish consumption in 1918 of the articles which rose most in price; this was brought about by a comparatively large decrease in importation, and by an increase (or a comparatively small decrease) in exportation of such commodities.

1917	1917 by	141·0	135·9
1918	1918 by	185·3	202·1

* Decrease.

It will be seen that the prices of exports rose more than the prices of imports from 1904 to 1914; the prices of imports then increased somewhat more than exports up to 1917; but while the prices of exports in 1918 showed an increase of 202·1 per cent. over 1904 the prices of imports had only increased by 185·3 per cent.

FAVOURABLE CHANGE IN THE BALANCE OF TRADE.

The serious decrease during the last few years in the volume of imports and exports has some favourable aspects:—

- (1) The decrease in imports was made good to some extent by increased Irish production. For instance, the effect of the large decrease in the imports of maize and other feeding stuffs was largely counterbalanced by increased production of Irish substitutes (oats, potatoes, etc.), and the decrease in the imports of flax was to some extent made good by increased home production. The decrease in imports of bacon, butter, etc., resulted in a larger consumption and smaller export of the Irish articles. In other directions, however, Irish substitutes were not available and the decreased importation (e.g. of sugar) led to a fully equivalent decrease in consumption.

(2) From 1915 to 1918, while the volume of imports fell by 26 per cent., the volume of exports fell only 13 per cent. In each year from 1904 to 1913 the volume of the imports (measured at 1904 prices) exceeded the exports, but in 1914, 1916, 1917 and 1918 the volume of the exports was greater than the imports. Whereas in 1904 the volume of the imports exceeded the exports by 11·2 per cent., in 1918 the exports (measured at 1904 prices) exceeded the imports by 14·6 per cent.

(3) While from 1904 to 1918 the prices of the commodities imported in 1918 increased by 185·3 per cent., the prices of the exports increased by 202·1 per cent.

The combined effect of the changes (2) and (3) has been to bring about a considerable change in the balance of trade. While the total value of the imports in 1904 exceeded the total value of the exports in that year by £5,560,000 or 11·2 per cent., the total value of the exports in 1918 (at 1918 prices) exceeded the value of the imports by £26,885,000 or 21·3 per cent.

The following tables give a somewhat more definite idea of the changes which have taken place in Irish trade from 1916 to 1918. The values are expressed to the nearest thousand pounds :—

Reading across the first three columns of the above table it will be observed that the value of both the imports and of the exports of each of the three groups of commodities increased from 1916 to 1917 and from 1917 to 1918, with the single exception

of the imports of Farm Produce, Food and Drink, which decreased in value from 1917 to 1918. On the other hand, reading across the last three columns it will be seen that the volume of both the imports and the exports of each of the three groups decreased from 1916 to 1917 and from 1917 to 1918, with the single exception of the exports of manufactured goods which increased in volume from 1916 to 1917.

In tables presented later it will be seen that in each year from 1904 to 1918 the value of the imports of farm produce, food and drink, was less than the value of the exports, that the value of the imports of raw materials was greater than the value of the exports, and that the value of the imports of manufactured goods was greater than the value of the exports. It will be noticed from the above table that while the difference between the imports and exports of farm produce, food and drink stuffs largely increased from 1916 to 1918, the corresponding difference for manufactured goods almost disappeared in 1917 and 1918.

The following table shows the relative importance of the trade in each of the above three groups of commodities; the value of the trade in each group is expressed as a percentage of the total value of imports and exports respectively:—

	VALUED AT PRICES IN THE YEAR OF SHIPMENT.			VALUED AT 1904 PRICES.		
	1916.	1917.	1918.	1916.	1917.	1918.

Manufactured Goods	38	42	45	37	41	40
Total ...	100	100	100	100	100	100

The above table shows the relative decrease in the importance of the trade (both import and export) in farm produce, food and drink as compared with the trade in manufactured goods.

The value of Farm Produce, Food and Drink Stuffs, imported accounted for 37 per cent. of the total imports in 1916, but for only 27 per cent. of the total imports in 1918. The exports of this group accounted for 58 per cent. of the total exports in 1916, but for only 51 per cent. in 1918.

The value of the imports of manufactured goods made up only 46 per cent. of the total imports in 1916, but 56 per cent. in 1918; the value of the exports of this group accounted for only 38 per cent. of the total exports in 1916, but for 45 per cent. in 1918.

I. FARM PRODUCE, FOOD AND DRINK.

In the following table, which shows the total Irish trade in this group of commodities, the values are expressed to the nearest thousand pounds.

When scrutinising the figures it should be borne in mind that the abnormally large exports in 1913 and 1914 were not due either to increased production or decreased consumption in Ireland. They were occasioned in both years by exceptionally heavy shipments of cattle which, in the ordinary course, would have been exported in other years. Many of the cattle exported in 1913 would have been shipped in 1912 but for the restrictions on exports in that year on account of foot and mouth disease. Exceptionally large numbers of cattle were exported in the war months of 1914 which, in normal times, would not have been exported until 1915.

1918 ..	34,431	78,254	43,823	13,286	28,342	15,056

The above table shows that the value of the exports of Farm Produce, Food and Drink, was greater than the value of the imports in each year from 1904 to 1918, and that the difference has greatly increased in recent years. The value of imports, measured at 1904 prices, rose to a maximum in 1914; this value

amounted to £22,997,000. This fell to £13,286,000 in 1918, a decrease of 42 per cent. The volume of exports as well as the volume of imports fell from 1916 to 1918, exports by only 17 per cent., imports by 37 per cent. The prices of imports in 1918 of this group increased from 1904 to 1918 by 159 per cent.; the prices of exports in 1918 increased from 1904 to 1918 by 176 per cent. The following table indicates the changes in volume from 1916 to 1918 :—

Live Stock.—The decrease in exports in 1918 was principally due to abnormally low shipments of cattle, the number exported for the year being only 720,112, against an average of 873,526 in the previous three years. The small shipments in 1918 resulted in abnormally large stocks in Ireland in 1919.

Dead Meat.—The imports of bacon and hams fell from 43,408 tons in 1916 to 16,438 tons in 1918; the exports fell from 59,269 tons in 1916 to 20,571 tons in 1918. Part of the decrease in exports was due to increased consumption of the Irish product in Ireland, but much of the decrease was due to a serious falling off in production; the number of pigs in Ireland fell after the very bad potato season of 1916 from 1,290,289 on 1st June, 1916, to 947,472 in 1917, and 974,385 in 1918.

Eggs, Butter, etc.—The exports of butter fell from 38,223 tons in 1916 to 22,796 tons in 1918, and of margarine from 8,161 tons in 1916 to 6,318 tons in 1918; but the exports of cheese increased from 671 tons in 1916 to 6,823 tons in 1918, and the exports of eggs from 8,254,339 gt. hhds. in 1916 to 8,769,698 gt. hhds. in 1918. The exports of poultry fell from 16,297 tons in 1916 to 14,731 tons in 1918.

Fish.—While the imports decreased from 1916 to 1918 the exports increased.

Fruit and Vegetables.—The imports of fruit decreased from 34,126 tons in 1916 to 6,553 tons in 1918; the exports increased from 4,022 tons to 12,534 tons. The exports of potatoes increased from 237,774 tons in 1916 to 343,099 tons in 1918.

Grain, etc., and Feeding Stuffs.—The imports of wheat decreased from 383,803 tons in 1916 to 259,676 tons in 1918, but the imports of wheat flour increased from 241,512 tons in 1916 to 280,362 tons in 1918. The imports of barley decreased from 72,726 tons in 1916 to 53,773 tons in 1918, and of malt from 24,901 tons to 1,809 tons. The imports of rye remained at the same level, but the imports of maize fell from 509,817 tons in 1916, to 107,747 tons in 1918. The imports of rice increased from 3,955 tons in 1916 to 11,872 tons in 1918. The imports of bran and pollard fell from 54,392 tons in 1916 to 2,074 tons in 1918, and of oilcake from 57,001 tons in 1916 to 20,794 tons in 1918. The exports of oats decreased from 102,281 tons in 1916 to 83,848 tons in 1918, although the production of oats in Ireland increased from 890,767 tons in 1916 to 1,448,556 tons in 1918. The exports of hay and straw increased from 22,746 tons in 1916 to 73,581 tons in 1918.

Tea, Coffee, etc.—The imports of tea increased from 35,100,800 lbs. in 1916 to 36,231,104 lbs. in 1918, and of cocoa from 5,274,192 lbs. to 6,154,960 lbs., but the imports of sugar decreased from 110,728 tons in 1916 to 74,128 tons in 1918.

Tobacco and Snuff.—The imports of unmanufactured tobacco decreased from 12,263,370 lbs. in 1916 to 11,391,669 lbs. in 1918. The imports of manufactured tobacco fell from 4,759,944 lbs. in 1916 to 3,957,660 lbs. in 1918, and the exports from 8,739,248 lbs. in 1916 to 7,670,169 lbs. in 1918.

Spirits, Beer, Wine, etc.—The imports of Foreign spirits fell from 770,101 proof gallons in 1916 to 220,688 proof gallons in 1918, and the exports of home-made spirits, from 3,943,918 proof gallons in 1916 to 3,120,171 proof gallons in 1918. The exports of industrial spirits rose from 3,737,888 proof gallons in 1916 to 8,646,690 proof gallons in 1918. This transition diminished the exports of the group "Farm Produce, Food and Drink." The imports of ale and beer fell from 122,363 barrels in 1916 to 49,603 barrels in 1918, and the exports of porter fell from 893,777 hhds. in 1916 to 490,422 hhds. in 1918. The imports of wine decreased from 1,564,662 gallons in 1916 to 850,525 gallons in 1918. The exports of aerated and mineral waters fell from 255,235 cwts. in 1916 to 116,971 cwts. in 1918.

An idea of the importance to Great Britain of the Irish exports of Farm Produce, Food and Drink, will be obtained from the following table, which, in addition to showing the estimated values of the Irish exports, also gives the values of the imports into the United Kingdom of this group from the principal Foreign Countries and British Possessions. The values are expressed to the nearest thousand pounds.

When considering the above table it should be remembered that the exports from Ireland are valued free on board ship at the Irish ports and do not include insurance or freight, whereas the cost of insurance and freight are included in the values of exports shown for the other countries.

The above figures contrast the total exports from Ireland with the total imports of farm produce, food and drink stuffs from the principal countries of supply into the United Kingdom (not into Great Britain). Official figures are not available, but fairly accurate estimates can be made, which would give a direct comparison between Ireland and other countries as suppliers to Great Britain of this group of commodities. To make the comparison exact, the figures for Ireland should be reduced by the values of the Irish produce consumed abroad, and the figures for other countries should be reduced by the values of the goods consumed in Ireland which are included in the totals for the United Kingdom. The deductions would be comparatively small, and the figures shown in the last table, and in the above paragraphs, indicate with sufficient accuracy the importance of the part played by Ireland as a supplier of food stuffs to Great Britain.

* The figures of exports to the United Kingdom, as shown in this table, have been extracted from the Annual Statement of the Trade of the United Kingdom, 1918, Vol. II. (Cd. 366—1918).

Attention is directed to the tables in Appendix I. of this Report, which show for the year 1918 the quantities and values of each of the chief articles of agricultural produce imported into the United Kingdom from Foreign Countries and British Possessions and the corresponding exports from Ireland. The following are some of the more important facts disclosed by the Appendix.

The value of *Cattle and beef* exported from Ireland to Great Britain in 1918 exceeded the value imported from any other country. The Irish export amounted to a value of £23,716,000, the next largest import was from the United States of America, valued at £20,527,000. The import from Argentina, valued at £18,295,000, came next in order of magnitude.

The Irish export of *Sheep and mutton*, valued in 1918 at £2,504,000, was the third greatest, being exceeded by the imports from New Zealand, £5,077,000, and Argentina, £3,661,000.

As regards the total value of *Bacon, hams, pork, and live pigs*, Ireland came third on the list with a value amounting to £6,119,000, as compared with £86,932,000 from the United States of America, and £15,885,000 from Canada.

The export of *Poultry* from Ireland was much greater than that from any other country to the United Kingdom, Ireland exporting to Great Britain poultry to the value of £2,750,000, while the largest value of imports from other countries to the United Kingdom was from the United States, £173,000.

The Irish export of *Butter*, 456,000 cwts., valued £5,437,000, was the second greatest in quantity and value; the export from Australia into the United Kingdom amounted to 540,000 cwts., valued at £6,723,000; that from New Zealand came third, value £4,599,000.

The Irish export of *Eggs* far exceeded, both as regards quantity and value, the imports from any other country, amounting to 8,770,000 gt. hunds., valued at £15,603,000; the imports into the United Kingdom from Denmark being the next largest in quantity amounting to 1,171,000 gt. hunds., valued at £2,592,000. The imports from Egypt were 730,000 gt. hunds., valued at £715,000.

The Irish export of *Potatoes*, which amounted to 343,099 tons, valued at £1,908,000, was the largest import of potatoes into Great Britain. The quantity imported from the Channel Islands though amounting to only 50,556 tons, was valued at £1,039,000, as their trade is chiefly in early potatoes.

As regards *Oats*, the export from Ireland (1,677,000 cwts.) was third, the United States (6,009,000 cwts.), and Canada (3,410,000 cwts.), being the largest exporters to the United Kingdom.

II.—RAW MATERIALS.

In the following table which shows the total Irish trade in this group of commodities the values are expressed to the nearest thousand pounds.

The value of the imports of raw materials was considerably in excess of the exports in each year from 1904 to 1918. The raw materials imported in 1918 increased in price from 1904 to 1918 by 226 per cent., the raw materials exported in 1918 increased in price from 1904 to 1918 by 162 per cent.

The volume of imports measured at 1904 prices decreased from 1916 to 1918 by 25 per cent., and of the exports by 27 per cent.

The following table gives some details of the changes in this interval:—

The decrease in imports was principally due to a falling off in the imports of flax and other textile raw materials; the decrease in exports was most marked in the exports of fats and textile raw materials.

Wood, Hewn and Sawn.—The imports of rough timber decreased from 31,916 loads in 1916 to 20,787 loads in 1918, and the imports of boards and deals from 127,014 loads in 1916 to 51,122 loads in 1918. Imports of corks and corkwood increased from 2,214 loads in 1916 to 3,814 loads in 1918. Exports of pitwood increased from 28,364 loads in 1916 to 47,004 loads in 1918, and exports of other rough timber from 93,443 loads in 1916 to 137,922 loads in 1918.

Stones, Ores, etc.—From 1916 to 1918 imports of slates increased from 14,973 tons to 20,032 tons, imports of salt from 32,893 tons to 39,457 tons, imports of pitch from 77,351 cwts. to 114,081 cwts. In the same interval the imports of tar decreased from 52,432 cwts. to 21,111 cwts., and imports of pipeclay from 26,751 cwts. to 16,590 cwts. Exports of limestone decreased from 76,321 tons in 1916 to 35,766 tons in 1918, and of marble, granite, etc., from 10,061 tons in 1916 to 2,051 tons in 1918. Exports of burnt ore increased from 30,549 tons in 1916 to 45,328 tons in 1918.

Fats.—From 1916 to 1918 the imports of oleo increased from 55,619 cwts. to 189,659 cwts., but the imports of lard fell from 73,461 cwts. to 52,801 cwts., and of tallow from 39,551 cwts. to 13,991 cwts. The exports of lard fell from 82,574 cwts. in 1916 to 19,232 cwts. in 1918, and the export of grease from 45,801 cwts. to 31,989 cwts.

Hides, Wool, etc.—From 1916 to 1918 imports of wool decreased from 4,904,928 lbs. to 1,959,216 lbs., imports of bristles from 610,736 lbs. to 543,088 lbs., and of curled hair from 13,113 cwts. to 6,452 cwts. The exports of wool increased from 10,322,928 lbs. in 1916 to 12,974,752 lbs. in 1918, of feathers from 16,185 cwts. to 19,262 cwts., and of hides and skins from 214,940 cwts. in 1916 to 222,307 cwts. in 1918.

Flax.—Imports of flax fell from 32,576 tons in 1916 to 6,442 tons in 1918, and the exports from 4,664 tons in 1916 to 614 tons in 1918.

Other Textile Raw Materials.—Imports of raw cotton fell from 164,155 cwts. in 1916 to 16,220 cwts. in 1918, imports of tow and codilla from 7,382 tons to 4,034 tons. Imports of hemp increased from 17,925 tons in 1916 to 22,271 tons in 1918, and of cotton waste from 1,857,744 lbs. to 2,573,424 lbs. Re-exports of raw cotton fell from 154,427 cwts. in 1916 to 10,478 cwts. in

1918. Exports of waste (flax, hemp and tow) increased from 178,974 cwts. in 1916 to 209,422 cwts. in 1918, and exports of rags from 8,114 tons in 1916 to 10,573 tons in 1918.

Other Materials.—From 1916 to 1918 imports of flax seed increased from 133,754 cwts. to 155,428 cwts., imports of wood pulp fell from 12,466 tons to 7,212 tons. Exports of plants and bulbs fell from 6,511 cwts. in 1916 to 3,726 cwts. in 1918.

III.—MANUFACTURED GOODS.

Before dealing with the trade in this group of articles it should be stated that while the records of the trade in the two previous groups are on an unsatisfactory voluntary basis, the records for this group are extremely unsatisfactory. It is with regard to this group that the necessity of compulsory returns is most urgent.

In the following table, which shows the Irish trade in manufactured goods, the values are expressed to the nearest thousand pounds :—

1918 ..	69,898	69,308	590	24,219	20,233	3,986

It will be observed that in each year from 1904 to 1916 the value of the imports of manufactured goods was substantially greater than the exports, but in 1917 and 1918 the value of imports was only very slightly in excess of the value of exports. The manufactured goods imported in 1918 increased in price from 1904 to 1918 by only 189 per cent., while the manufactured goods exported in 1918 increased in price from 1904 to 1918 by 243 per cent.

From 1916 to 1918 the volume of imports of manufactured goods as measured at 1904 prices decreased by 11.4 per cent., and the volume of manufactured goods exported decreased by only 7.8 per cent. The following table gives some details of these changes :—

Yarns.—From 1916 to 1918 imports of cotton yarn decreased from 28,283,472 lbs. to 23,472,288 lbs., of linen yarn from 5,199,600 lbs. to 3,850,672 lbs., of thread from 1,391,040 lbs. to 1,040,928 lbs., and of jute yarn from 2,428,720 lbs. to 1,672,944 lbs. The exports of linen yarn increased from 18,020,576 lbs. in 1916 to 24,014,480 lbs. in 1917, but fell to 7,989,408 lbs. in 1918. The exports of thread fell from 5,522,272 lbs. in 1916 to 3,524,864 lbs. in 1918; the exports of rope, cordage and twine remained fairly steady, being 274,347 cwts. in 1916, and 278,788 cwts. in 1918.

Piece Goods, Drapery, etc.—The decrease in imports of this group was chiefly due to the falling off in the imports of goods described as "Drapery." The imports of these goods measured at 1904 prices decreased from £3,500,714 in 1916 to £2,429,574 in 1917, and to £2,028,922 in 1918. The decrease in exports was chiefly due to the smaller shipments of linen goods. The exports of linen goods measured at 1904 prices decreased from £8,124,060 in 1916 to £7,867,185 in 1917, and to £6,951,173 in 1918.

Leather Goods and India Rubber Goods.—The imports of leather fell from 64,756 cwts. in 1916 to 49,823 cwts. in 1918. The imports of boots and shoes which fell from 159,322 cwts. in 1916 to 130,150 cwts. in 1917, increased to 153,286 cwts. in 1918. There was comparatively little change from 1916 to 1918 in the quantity of india rubber goods imported.

Metal Castings.—Most of the increase in the imports of this group was due to the increased imports of plates and sheets, which rose from 15,864 tons in 1916 to 84,110 tons in 1918. The imports of bolts, rivets and nuts increased from 6,192 tons in 1916 to 10,405 tons in 1918.

Machinery, Ships, etc.—The imports of machinery described as agricultural amounted to 2,342 tons in 1916, 3,351 tons in 1917, and 1,939 tons in 1918, and the imports of agricultural implements amounted to 85,392 cwts. in 1916, 172,771 cwts. in 1917, and 135,008 cwts. in 1918. The imports of machinery specifically described as "Textile" fell from 875 tons in 1916 to 667 tons in 1917, and to 597 tons in 1918. The imports of "Machinery Unclassified" valued at 1904 prices amounted to £990,550 in 1916, £912,150 in 1917, and £1,165,900 in 1918. The value of exports of machinery at 1904 prices was £643,468 in 1916, £546,086 in 1917, and £547,146 in 1918. Comparing 1916 with 1917 or 1918 there was but little change in the value of the exports of steam vessels estimated at 1904 prices.

Wooden Manufactures.—The most important changes in this group were in the imports and exports of furniture. Imports of furniture measured at 1904 prices fell from £272,391 in 1916 to £192,234 in 1917, and to £188,825 in 1918; the exports measured at 1904 prices were £130,001 in 1916, £104,269 in 1917, and £106,064 in 1918.

Paper, Stationery, etc.—The imports of paper decreased from 684,437 cwts. in 1916 to 496,848 cwts. in 1917, and to 377,922 cwts. in 1918; the exports (including re-exports) were 217,968 cwts. in 1916, 189,155 cwts. in 1917, and 132,085 cwts. in 1918.

Bricks, Earthenware, etc.—The most important change in this trade was the decrease in the imports of glass and glassware. The imports of bottles which amounted to 309,542 cwts. in 1916 only amounted to 194,616 cwts. in 1917, and 165,410 cwts. in 1918. The imports of other glassware and glass were 130,743 cwts. in 1916, 79,187 cwts. in 1917, and 72,723 cwts. in 1918.

Soap, Oils, etc.—From 1916 to 1918 the imports of starch fell from 66,234 cwts. to 24,446 cwts., Candles from 75,278 cwts. to 53,392 cwts., Matches from 39,325 cwts. to 1,413 cwts., Turpentine from 18,275 cwts. to 11,011 cwts., Paraffin Shale from 50,095 cwts. to 29,958 cwts., Sizing from 22,821 cwts. to 16,655 cwts. The increase in the exports of this group in 1917 and 1918 as compared with 1916 was due to increased shipments of industrial spirit, the exports of which were 3,737,888 proof gallons in 1916, 11,152,112 proof gallons in 1917, and 8,646,690 proof gallons in 1918.

Chemicals, Fertilisers, etc.—From 1916 to 1918 imports of copper sulphate increased from 3,128 tons to 5,682 tons, Saltpetre from 8,192 cwts. to 53,230 cwts., Bicarbonate of Soda from 84,213 cwts. to 119,362 cwts., Basic Slag from 29,767 tons to 58,493 tons, Sulphate of Ammonia from 5,098 tons to 25,224 tons, Phosphate Rock from 99,492 tons to 106,578 tons. Imports of Soda Nitrate fell from 12,665 tons in 1916 to 8,284 tons in 1918. Exports of Alumina amounted to 354,750 cwts. in 1916, 389,747 cwts. in 1917, and 342,930 cwts. in 1918. Exports of fertilisers fell from 19,374 tons in 1916 to 17,178 tons in 1917, and to 14,520 tons in 1918.

The foregoing analysis indicates briefly the extent and character of Irish trade. With regard to the question of the source or country of origin of the imports and the final destination of the exports, as stated in previous Reports, the existing returns furnish little information. The trade which passes directly between Ireland and colonial and foreign countries is known, and the more important details as regards this trade at the chief ports in Ireland are presented annually by the Customs and Excise Department in their Statement of the Trade of the United Kingdom. The direct imports of foreign and colonial goods into Ireland during 1918 amounted to a value of £15,031,537, whereas the direct exports amounted to only £559,497. But as regards the indirect colonial and foreign trade of Ireland which passes to and from the Irish ports *via* Great Britain, there are at present no means of distinguishing this from the colonial and foreign trade of Great Britain. Consequently the total trade of Ireland with countries outside of Great Britain cannot at present be ascertained.

In conclusion, I desire to acknowledge the assistance given by the Harbour Authorities of Ireland, the Railway and Shipping Companies, and by many individual importers and exporters, in furnishing information for this Report. I am also specially indebted to the Principal of the Statistical Office of the Customs and Excise Department for information which he has kindly furnished.

I am, Sir,

Your obedient Servant,

JOHN HOOPER,

Superintendent of Statistics and Intelligence Branch.

APPENDIX II.

The following tables (pp. 102-113) extracted from publications issued by the Bureau of Statistics, Washington, show the imports and exports into and from Ireland from and into the United States during the twelve months ended 30th June, 1918. The tables, however, do not cover the whole trade between Ireland and the United States. Goods manufactured or produced in Ireland, sold to firms in England, and by them exported to the United States, are, as a rule at least, accredited in the reports of the Bureau to England and not to Ireland.
